

1. **cinder cone volcano:**

2. **cinder cone volcano:** violent eruptions
3. **cinder cone volcano:** made of ash, cinders, and lava bombs, pyroclastic material
4. **cinder cone volcano:** steep cone shape
5. **composite volcano:** quiet eruptions alternate with more violent eruptions
6. **composite volcano:** made of lava flow eruptions alternating with eruptions of ash, cinders, and lava bombs
7. **composite volcano:** shaped like a pyramid or triangle
8. **composite volcano:**

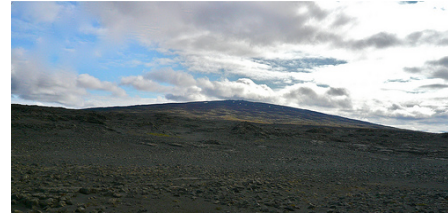

9. **hot spot:** volcanoes that form in the middle of tectonic plates over super heated parts of the mantle
10. **lava volcano:** volcanoes built by slow eruptions and sometimes formed with a crater
11. **lava volcano:** Lava domes are formed when erupting lava is too thick to flow and makes a steep-sided mound as the lava piles up near the volcanic vent. Example: Mount Saint Helen
12. **lava volcano:**

Major volcano that erupted in 1980

13. **shield volcano:**

14. **shield volcano:** made of repeated lava flows
15. **shield volcano:** broad, gently sloping shape
16. **shield volcano:** quiet eruptions
17. **super volcano:** a volcano formed when the entire magma chamber erupts and the ground collapses over top creating a huge caldera
